This application contains claims directed to the following patentably distinct species:

- (1) The grid and screen is permanently attached to the tank
- (2) The grid and screen are configured to be removed from the tank.

The species are independent or distinct because they exhibit mutually exclusive characteristics. To search and examine both species would present a serious burden for the Office.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.  
MPEP § 809.02(a).

Newly amended claim 1 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the originally presented

claims were directed solely to a species having the grid and screen permanently attached to the tank. Now applicant has amended the claims to read on a previously unclaimed species directed to a grid and screen configured to be removable from the tank.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, **amended claims 1 and 3-7 directed to a non-elected invention have not been entered because the Office does not permit a shift of inventions.** See 37 CFR 1.142(b) and MPEP § 821.03. **In response to this restriction requirement applicant must amended the original claims in a manner that is consistent with the species elected by the original presentation of claims.**
